Synth

Modal Argon8

104 parameters · 11 sections · plain CC, no NRPN · transcribed from the maker's manual

One map for the family

The same chart serves the Argon8, Argon8M and Argon8X.

Modulation slots by number

All eight modulation slots are addressable: depth on CC 88 to 95, source on CC 100 to 107 and destination on CC 108 to 115. That is unusual and worth knowing.
